Project Development Phase

Functional Testing

Date 30 September 2026

Team ID PNT2022TMIDxxxxxx

Project Name Implement Client Script & UI Policy (Incident)

Maximum Marks

Functional Testing:

Project team shall fill the following information in functional testing template.

S.No.	Parameter	Values / Expected Result
1.	Client Script Summary	Client Script is implemented on the Incident form to validate and dynamically control field values based on user actions.
2.	Client Script Validation	The script executes correctly when the specified Incident form event occurs and produces the expected field behavior without errors.
3.	UI Policy Summary	UI Policy is configured on the Incident form to control field visibility, mandatory status, and read-only behavior according to defined conditions.
4.	UI Policy Validation	When the configured condition is satisfied, the Incident form fields automatically change according to the UI Policy rules.
5.	Final Functional Result	Client Script and UI Policy work correctly together on the Incident form and provide the expected user interface behavior.
